300+ MB	7	3+ years
Production databases managed	**Automated systems and processes**	**Automating processes with code**

PROFESSIONAL SUMMARY

Turning manual, slow, or paper-based processes into automated, scalable, and reliable systems — that's what drives me. I'm a **Software Developer** focused on **data architecture and business process automation**, with real-world experience managing large-volume production databases and designing end-to-end systems that now support live operations. I enjoy digging into the problem behind each requirement, designing the most suitable solution, and taking it to production. **Proactive, resilient, and constantly curious** about learning new technologies and domains.

PROFESSIONAL EXPERIENCE

Mid-Level Software Developer — PITSE
Jul 2023 – Jul 2026

Province of Buenos Aires, Argentina

- **Design and automate critical business processes** (CRUD operations, error handling, B2C flows) on a database that grows from **~8 MB to over 300 MB**, eliminating repetitive manual tasks.
- **Diagnose and resolve critical production incidents**, prioritizing root cause over symptoms and restoring service with no impact on end users.
- Act as a **bridge between business and development**, translating business rules and terminology into concrete technical solutions.

Systems Manager (part-time) — Carolina Gil Seguros
Aug 2026 – Present

Province of Buenos Aires, Argentina

- Lead the company's end-to-end digital transformation, migrating 100% paper-based processes to software platforms, applying the same automation and scalability approach that underpins my data engineering projects.
- Design the architecture and organization of the company's website and web system, defining data structures and information flows, laying the groundwork for future analytics and reporting.
- Plan and deliver internal training sessions to ensure adoption of the new system, managing the organizational change end to end.

INDEPENDENT PROJECTS

Stock Control and E-commerce System — Independent Project
Apr 2026 – Jul 2026

Independent consulting / development for an SME

- Identified a purchasing and stock process that was **100% manual and paper-based**, and **automated** the entire workflow: inflows, outflows, cost/margin calculation, and cash reconciliation.
- Stock Management System with create, update, and delete operations. Integrated modules: External Movements (merchandise inflows and outflows), Products, Customers, Cash Register, Debtors, Business Logic, and cash solvency.
- URL: `Stock Control System`

Services Website — Independent Professional (Tarot Reader)
Mar 2026

- **Automated the contact and ordering flow via WhatsApp**, speeding up customer conversion. — https://tarot-web-alpha.vercel.app/

Corporate Website — RV Soluciones (Logistics Company)
Jan 2026

- Designed the digital identity of a logistics company to speed up and simplify business contact. — rv-web-c.vercel.app

TECHNICAL SKILLS

Data & modeling: SQL, MySQL, PostgreSQL, MongoDB, relational model design, Navicat, HeidiSQL, AWS, Oracle

Architecture & backend: Node.js, Express, PHP, CakePHP v.2, API architecture, CRUD

Frontend & tools: React, Redux, JavaScript, HTML, CSS, Bootstrap, Git, Scrum/Agile, Python

EDUCATION

- **Information Systems Engineering.** UTN (National Technological University). 2023 – Present
- **Technical Degree in Computer Science.** Instituto Leonardo Murialdo. 2019 – 2022
- **Full Stack Web Developer.** Henry Bootcamp. 700 hours of theory and hands-on practice. 2022 – 2023
- **Languages:** English — B2, Upper-Intermediate · Spanish — Native
