Systems and processes automated

3+ years

Automating processes with code

PROFESSIONAL SUMMARY

Turning manual, slow, or paper-based processes into automated, scalable, and reliable systems — that is my driving force. I am a **Software Developer** focused on **data architecture and business process automation**, with hands-on experience managing large-volume production databases and designing end-to-end systems that now sustain real operations. I enjoy digging into the problem behind every requirement, designing the most suitable solution, and taking it to production. **Proactive, resilient, and constantly curious** about learning new technologies and domains.

PROFESSIONAL EXPERIENCE

Software Developer (Mid-Level) — PITSE

Jul. 2023 – Jul. 2026

Buenos Aires Province, Argentina

- ▶ **Design and automate critical business processes** (CRUD operations, error handling, B2C flows) on a database that has grown from ~8 MB to over 300 MB, eliminating repetitive manual tasks.
- ▶ **Diagnose and resolve critical production incidents**, prioritizing root cause over symptoms and restoring service with no impact on the end user.
- ▶ Act as a **bridge between business and development**, translating business rules and terminology into concrete technical solutions.

Systems Manager (part-time) — Carolina Gil Seguros

Aug. 2026 – Present

Buenos Aires Province, Argentina

- ▶ Lead the company's end-to-end digital transformation, migrating 100% paper-based processes to software platforms, applying the same automation and scalability approach that underpins my data engineering projects.
- ▶ Design the architecture and organization of the company's website and web system, defining data structure and information flows, and laying the groundwork for future analytics and reporting.
- ▶ Plan and deliver internal training sessions to ensure adoption of the new system, managing the organizational change end to end

INDEPENDENT PROJECTS

Inventory Control & E-commerce System — Independent Project

Jan. 2026 – Apr. 2026

Independent consulting / development for a small business (SME)

- ▶ Identified a **100% manual, paper-based** purchasing and inventory process, and **automated** the entire workflow: inflows, outflows, cost/margin calculation, and cash reconciliation.
- ▶ Built a **real-time reporting dashboard** (weekly and monthly margins) that gave the business visibility into its profitability for the first time.
- ▶ URL: [Inventory Control System](#)

Services Website — Independent Professional (Tarot Reader)

Mar. 2026 – Mar. 2026

- ▶ **Automated the contact and ordering flow via WhatsApp**, speeding up customer conversion. — <https://tarot-web-alpha.vercel.app/>

Corporate Website — RV Soluciones (Logistics Company)

Jan. 2026 – Jan. 2026

- ▶ Designed the digital identity of a logistics company to speed up and simplify commercial contact. — <rv-web-c.vercel.app>

TECHNICAL SKILLS

Data & Modeling: SQL, MySQL, PostgreSQL, MongoDB, relational model design, Navicat, HeidiSQL

Architecture & Backend: Node.js, Express, PHP, CakePHP v.2, API architecture, CRUD

Frontend & Tools: React, Redux, JavaScript, HTML, CSS, Bootstrap, Git, Scrum/Agile

EDUCATION

- ▶ **Information Systems Engineering.** UTN. 2023 – Present
- ▶ **Technical Degree in Computer Science.** Instituto Leonardo Murialdo. 2019 – 2022
- ▶ **Full Stack Web Developer.** Henry Bootcamp. 700 hours of theory and practice. 2022 – 2023
- ▶ **Languages:** English — B2, Upper-Intermediate · Spanish — Native
